Navigating a Consulting Career
Kristina Hysler, PE
Environmental Science, Permitting and Compliance Technical Leader
Vice President/Principal Engineer, WSP E&I

Abstract
What career pathways have you been considering after graduation? This seminar will hone in on the world of consulting and the keys to success to making it in an entrepreneurial environment. Using my career in the 20 years since I graduated from the EWRE program, I will share examples of the technical and professional skills that have helped me move from a junior engineer to a technical leader in my company.

Background
Kristina Hysler currently leads the Environmental Science, Permitting, and Compliance GTEN domain for WSP E&I. She is a licensed civil engineer who has focused on water quality regulation development and implementation. Ms. Hysler began her career supporting the USEPA implementing Phase 2 stormwater regulations and collected water quality samples in the middle of the night to assess Total Maximum Daily Load compliance. In the last ten years, Ms. Hysler has worked with Southern California municipalities to negotiate and implement regional NDPES permits. She has led the multi-stakeholder process to develop and implement three watershed-based Water Quality Improvement Plans (WQIP).
